Land surveying services, Mikołów

Soft Skills

- Teamwork
- Problem solving
- Flexibility
- Communication
- Good time management
- Attention to details
- Learn from mistakes
- Responsible

Languages

- Polish - native
- English – B2
- German – A2

Interests

- modern technologies
- hiking
- bushcraft

About me

I am an aspiring Junior Frontend Developer, who is disciplined, ambitious, and ready to continuously develop my programming skills. I am interested in long-term collaboration and work that allows me to improve and contribute significantly to the company. I am able to work under pressure, both as a part of the team and independently when necessary. I enjoy problem-solving and leveraging my creativity in work.

Projects

Netflix clone – Fully responsive website, which is an advanced clone of the popular streaming service Netflix, with many of its features.

Github: <https://github.com/tomaszz95/Netflixclone> Live: <https://netflixcloneen.vercel.app/>

A website that is a 'clone of Netflix' – it is fully responsive, with best SEO and accessibility practices and with many utilities taken from the original streaming site. The application contains a lot of sub-pages, starting from the main view, through the whole process of registering and logging in, selecting a profile and editing it, up to the main page of series, movies and individual sub-pages and search pages. This is my biggest and most advanced project – the app is built with about 250 components and contains around 30 different subpages (also dynamic ones).

Stack: NextJS, React, Typescript, Firebase, CSS, Git/Github, RWD, SEO, Accessibility.

Gradebook - An online app for students and teachers

Github: <https://github.com/tomaszz95/gradebook> Live: <https://gradebookk.vercel.app/>

An application that partially mimics the operation of an electronic gradebook. The app allows you to check your timetable, your grades, statistics in relation to your grades and other students/classes. As a teacher, you can add news, add grades to individual students. It combines frontend with backend and retrieving data from databases.

Stack: NextJS, React, Typescript, Firebase, MongoDB, CSS, Git/Github, SEO, Accessibility.

Toolkit - A website with several apps: Todo List, Notes, Calculator, Financial management, Weather App

Github: <https://github.com/tomaszz95/toolkit> Live: <https://toolkiit.netlify.app/>

A website with the most popular frontend projects written in React, using React Redux and React Router, as well as Local Storage. The page is fully responsive.

Stack: React, React Redux, CSS, Git/Github, RWD, SEO, Accessibility.

Surveying website - A simple website for a surveying company

Github: <https://github.com/tomaszz95/geodesy-site> Live: <https://asgeodesy.netlify.app/>

This is a fully functional and responsive website for a surveying company - incorporating good practices for SEO, accessibility, cleanliness and quality of written code.

Stack: HTML, CSS, Javascript, Gulp, Git/Github, RWD, SEO, Accessibility.
