Land surveying services, Mikołów

Soft Skills

- Teamwork
- Problem-solving
- Effective communication
- Good time management
- Attention to details
- Adaptability
- Self-discipline

Languages

- Polish - native
- English – B2

Interests

- Modern technologies
- Hiking
- Bushcraft
- Music

About me

I'm a driven junior frontend developer with a relentless dedication to honing my craft. With over two years of self-study in programming, I'm now eager to embark on my professional journey. While I may lack commercial experience, my proficiency in frontend technologies positions me confidently for junior roles. Looking ahead, I aspire to broaden my skill set and transition into a full-stack developer, particularly focusing on backend development and database management.

Selected projects

Portfolio – portfolio page with more information about me
Live: https://tomaszzportfolio.vercel.app

- The website includes a fully functional, validated contact form using Formspree,
- Approximately 100 unit tests were written using JEST and React Testing Library,
- Animated using Framer Motion,
- Maintaining RWD standards, Accessibility and SEO practices.

NextJS ○ React ○ Typescript ○ Tailwind ○ JEST / React Testing Library ○ RWD / SEO

Netflix clone – my most advanced project, which is an clone of the popular streaming service Netflix, with many of its features
Live: https://netflixcloneen.vercel.app/

- User authentication features (login, sign-in, logout, register) using Firebase,
- Downloading data from IMDB API (series and movies data),
- Ability to dynamically search for an interesting production by title,
- The project is quite complex - built with about 250 components,
- Maintaining RWD standards, Accessibility and SEO practices,
- Static and dynamic pages (around 30 subpages and also the dynamic ones).

NextJS ○ React ○ Typescript ○ Firebase ○ CSS ○ RWD / SEO ○ Git / Github
